

Atta Rahman

UI/UX Designer

attarahman406@gmail.com · [Portfolio](#) · [LinkedIn](#)

PROFILE

UI/UX designer with hands-on experience across mobile, DTC/ecommerce, and AI-evaluation contexts, backed by a background in mechanical engineering and quality control. I turn research and strategy into information architecture, user flows, and interactive prototypes, then validate them with real users, an engineering mindset for precision and systems thinking runs through the process. Fluent in Figma, comfortable owning a problem from funnel diagnosis through developer handoff.

EXPERIENCE

Product Design / UX Expert (Contract) · **Mercor** May 2026 – Present

- Engaged as a subject-matter expert by Mercor Intelligence to apply professional UX/UI design standards to improve outputs from a top AI lab's generative models.
- Evaluate AI-generated design work against usability heuristics and interaction design principles, delivering structured feedback that raises outputs to a human-expert quality bar.
- Partner with a global team of researchers and designers to define how AI-generated design tasks are measured, bridging applied UX craft with AI model development.

UI/UX Designer · **Loopin** Nov 2025 – Feb 2026

- Owned end-to-end UX for a mobile app supporting parents of children with ADHD, from discovery research through high-fidelity Figma prototype.
- Ran 6 user interviews and synthesized findings into personas, journey maps, and a prioritized problem statement that shaped the core product direction.
- Redesigned the mood check-in flow based on usability testing, cutting task steps by 40%; 5/5 participants completed it unassisted in the final round.
- Applied progressive disclosure and card-based navigation to turn a complex emotional-tracking workflow into a simple, parent-friendly UI.

UI/UX Designer · **Receiptly** Apr 2025 – July 2025

- Designed an AI-powered expense tracking app from concept to MVP: information architecture, user flows, wireframes, and high-fidelity Figma components.
- Identified manual receipt entry as the primary drop-off point through user research; redesigned the capture flow around camera-first input, cutting steps from 5 to 2.
- Produced annotated specs and component documentation for developer handoff, reducing implementation back-and-forth by clarifying edge cases upfront.

Product Designer · **Veura Fragrance** Jan 2025 – March 2025

- Designed the full digital experience for a luxury DTC fragrance concept, from visual language through a fully interactive Figma prototype.
- Mapped the user journey from product discovery through checkout, structuring IA and navigation to minimize friction and support conversion.
- Built a reusable design system (typography, color tokens, components) to keep the experience consistent across every touchpoint.
- Delivered landing and product pages optimized for clarity, scannability, and purchase intent.

ENGINEERING BACKGROUND

Structural Engineer & Quality Control Lead · **Pan Orobica Steel Structures Ltd (Nigeria)** Nov 2019 – Dec 2023

- Led quality control across fabrication workflows for structural steel projects: developed inspection checklists, enforced tolerances, and coordinated cross-functional sign-off.
- Created detailed technical drawings and production documentation used by fabrication and installation teams.
- Managed production schedules and cross-team coordination under tight deadlines in a high-stakes manufacturing environment.

SKILLS & TOOLS

Design: User research · Information architecture · Wireframing · Prototyping · Usability testing · Journey mapping · Design systems · Conversion-focused UX · Visual design

Tools: Figma (prototyping) · Adobe Creative Suite · Framer · HTML/CSS · WordPress

Process: Agile · Cross-functional collaboration · Design critique · Developer handoff · Testing & iteration mindset

Edge: Engineering mindset: systems thinking, precision, structured problem framing

EDUCATION

Post-Graduate Diploma, Web & Mobile App Design and Development · **Langara College, Vancouver, BC, Canada.**

B.Eng. Mechanical Engineering · **Ahmadu Bello University, Zaria, Nigeria.**
